

KLEBIB *Semi-automatic machine to glue labels*

The KLEBIB is a versatile, semi-automatic machine to glue labels into cave cut step indexes.

Products	Book blocks, Bibles, Koran, dictionaries, encyclopedias, reference book, etc.
Formats	A6 to A4
Book height	max. 350 mm
Book width	min. 80 mm
Book thickness	max. 80 mm, depending on book width
Labels width	10 to 24 mm
Labels length	(10 to 24 mm)
Binding	all standard binding sorts
Cover	hard and soft covers
Operator	100 % manpower
Output	max. 60 cycles/min.
Change over time	5 – 20 minutes to change product
Technical data	dimensions 1100 x 1100 x 1300 mm (l x w x h) weight ca. 400 kg

Operating process

Precise mounting ensures a high degree of repeat accuracy when gluing. This improves the quality of the cut products.

Interesting features

- High precision
- The automatic gluing process is programmable
- Unlimited program memory
- Book thickness max. 80 mm
- Processing of all paper qualities
- Short change-over time
- 3 year guarantee
